Profile:	Female, 23, Single
Nationality:	Algerian
Current Location:	Al-Rayyan, Qatar
Last Position:	AI Developer & Data Scientist – Firasa AI (Doha, Qatar)
Total Experience:	3 years
Research Interests:	LLMs, NLP, AI agents, customer analytics, privacy-aware AI systems
Visa Type	Valid QID, NOC available
Languages:	Arabic: Native (mother tongue) - English: Proficient, French: Proficient - German : Beginner.
Notice Period:	Immediately

AI/ML Researcher & Data Scientist with hands-on experience in Python, SQL, Machine Learning, NLP, and LLMs. Research interests include LLM-powered systems, AI agent architectures, and AI-driven customer analytics. Experienced in data preparation, feature engineering, exploratory analysis, supervised and unsupervised learning (classification, regression, K-Means clustering, segmentation), model evaluation, prompt engineering, RAG, LoRA/PEFT fine-tuning, and Hugging Face. Conducted two applied research projects on LLM-based personalized marketing and on the cost, latency, reliability and privacy trade-offs of WhatsApp AI agents, and built end-to-end AI projects from data preparation and modeling to REST API integration and Docker-based deployment. Seeking a funded PhD position in AI/NLP.

Research Projects

AI-Driven Customer Segmentation & LLM-Based Personalized Marketing Ooredoo Algeria — Feb.-May 2026

- Research focus:** investigated how unsupervised learning combined with large language models can support data-driven, personalized marketing communication at telecom-operator scale.
- Methodology:** data preparation and feature engineering on subscriber behavioral data; subscriber segmentation with K-Means clustering; prompt-engineering strategies for LLM-generated, segment-specific SMS content.
- System & integration:** deployed the hybrid ML + LLM pipeline in a production-oriented microservices architecture (Apache Kafka, Docker, REST APIs).

Evaluating Cost, Latency, Reliability and Privacy Trade-offs in LLM-Powered WhatsApp AI Agent Architectures
Independent Research Project — Sep.-Oct. 2026

- Research focus:** comparative study of architectural design choices for LLM-powered conversational agents deployed on WhatsApp.
- Evaluation framework:** analysis of the trade-offs between four dimensions: operating cost, response latency, reliability, and privacy/data protection.
- Outcome:** practical guidance for selecting agent architectures according to deployment constraints and privacy requirements.

Work Experience

Sep 2026 – Present	FIRASA AI	Doha, Qatar (Hybrid)
--------------------	-----------	----------------------

AI DEVELOPER & DATA SCIENTIST

Responsibilities:

- Providing AI development services for Firasa AI, a Doha-based AI agency building practical AI systems for SMBs across HR, real estate, logistics, and manufacturing.
- Coordinating with the CTO to design and deliver client-facing AI solutions, including chatbots, workflow automation, and data-driven systems.
- Supporting data analysis and reporting using Python and Power BI.
- Contributing to bilingual (Arabic/English) AI solution delivery.
- Collaborating with the team within Qatar core business hours in a hybrid work setup.

Feb 2026 – Jul 2026
AI & SOFTWARE ENGINEER

OOREDOO

Algiers, Algeria

Responsibilities:

- **Project: Design and Development of a Bulk SMS System with AI-Powered Subscriber Segmentation & SMS Personalization**

Machine Learning: Built a hybrid AI pipeline leveraging K-Means clustering (unsupervised learning) for subscriber segmentation.

LLMs & NLP: Used Large Language Models with prompt engineering for dynamic, personalized message generation at scale.

Systems Engineering: Architected a microservices ecosystem using Apache Kafka, Docker, and REST APIs to serve AI models reliably at scale.

Jun 2024 – Current

Auto Entrepreneur

Remote, Algeria

FREELANCE COACH & TRAINER — AI / DATA / DEV

Responsibilities:

- Providing training and coaching in Artificial Intelligence, Machine Learning, Data Science, programming, and web development.

Jan 2024 – Jun 2024

WARACHAT PLATFORM

Remote, Algeria

AI & FULL STACK DEVELOPER

Responsibilities:

- Project: Intelligent Product Catalog for a BTP Marketplace. Developed an ML/NLP-powered solution for product standardization, classification, and catalog optimization using Python, Laravel, and Livewire.
- Applied supervised classification techniques to automatically categorize and standardize product listings.

Jun 2023 – Mar 2024

CONCENTRIX

Algiers, Algeria

IT SOLUTIONS CREATOR

Responsibilities:

- Developed a room booking system with a mobile app (Flutter) for users to reserve rooms and a web management app (Laravel) for administrators.
- Designed the underlying data model to support bookings, rooms, and users.

Jun 2024 – Sep 2024

RUYA TECH

Paris, FRANCE

LARAVEL DEVELOPER - REMOTE

Responsibilities:

- Designed and developed data-driven web applications using Laravel, focusing on scalable, reliable, and high-performance database-backed solutions.

Dec 2023 – Mar 2024

TECH FLY - MINIMO

Oran, ALGERIA

LARAVEL DEVELOPER - REMOTE

Responsibilities:

- Tech Fly: a development box specializing in digital solutions.
- Focused on clean code, database architecture, and query optimization, deepening expertise in Laravel/Livewire.

Volunteer works

Sept 2021 – Sept 2024

Scientific Club - CSCC

Blida, ALGERIA

TRAINER & COACH | EVENT ORGANIZER | TEAM LEADER IN DESIGN & WEB

Responsibilities:

- Training & Mentorship: Trained over 50 students in UI/UX design, web development, and graphic design through both onsite and online sessions.
- Team Leadership: Led a team of 10+ students on web and design projects, promoting collaboration, creativity, and technical skill development.
- Event Management: Organized scientific events such as conferences, workshops, and tech challenges, significantly increasing student engagement and participation.

Education

Sep 2024 – Jul 2026 : **Blida 1 University - USDB1 Algeria** - Master's Degree In Computer Systems & Networks (SIR)

Sep 2021 – Jul 2024 : **Blida 1 University - USDB1 Algeria** - Bachelor's Degree In Computer Science

BAC YEAR : **2021** - Scientific stream - Mention : Very Good (TRÈS BIEN (16.24/20))

Skills

Machine Learning & Data Science: Supervised Learning (classification, regression), Unsupervised Learning (K-Means Clustering, segmentation), Feature Engineering, Model Evaluation, Neural Networks, Deep Learning.

NLP & LLMs: LLMs, LoRA/PEFT, HuggingFace, Prompt Engineering, RAG, NLP, Fine-Tuning, LLM-powered AI agents.

Data Analytics & BI: Data Analytics, EDA, Power BI, Data Modeling, Data Visualization, Python, pandas, NumPy.

Databases: MySQL, PostgreSQL, MongoDB, SQL, Database Modeling, Data Normalization, Query Optimization.

Backend & Architecture: Python, Java, PHP, Laravel, Spring Boot, Apache Kafka, Docker, Microservices, REST APIs.

Frontend: React, Livewire, Flutter, JavaScript, HTML/CSS.

Tools & Development: Git/GitHub, Jupyter Notebook, Excel, Power BI, Figma, Adobe XD, Adobe Photoshop, Adobe Illustrator.

Key Projects

Subscriber Segmentation & SMS Personalization — Ooredoo :

- Developed an unsupervised machine learning pipeline using K-Means clustering to segment subscribers based on behavioral/data features.
- Performed data preparation and feature engineering to create model-ready datasets.
- Integrated LLM-based prompt engineering to generate personalized SMS content for different customer segments.
- Designed a scalable AI architecture using Python, Apache Kafka, Docker and REST APIs.
- Integrated the ML pipeline into a production-oriented microservices architecture.

Medical AI Chatbot — NLP / LLM :

- Fine-tuned a large language model using LoRA/PEFT for domain-specific medical dialogue.
- Prepared and processed domain-specific datasets for model training and evaluation.
- Applied prompt engineering and evaluated model responses using healthcare question-answering benchmarks.
- Worked with Hugging Face and Python for model development and experimentation.

Intelligent Product Catalog - Warachat

- Developed an ML/NLP classification pipeline for product standardization and automatic categorization.
- Performed data preparation and text processing for product information.
- Applied supervised machine learning techniques to classify product listings.
- Integrated the ML pipeline with a business application using Python, Laravel and Livewire.

Data Analytics / BI Projects

- Developed data analysis and visualization solutions using SQL, Excel and Power BI.
- Created dashboards and analytical views to transform raw data into actionable business insights.

HSam Medico - Market Research & Data Analytics

- Designed and conducted a structured market-research survey targeting Medicine, Dentistry, and Pharmacy students and residents, collecting 119 responses.
- Cleaned, structured, and analyzed the collected dataset using Power BI to identify content preferences, budget sensitivity, and key student needs.
- Created analytical insights on preferred learning formats, pricing expectations, and study challenges to support content planning and marketing strategy.
- Translated data-driven findings into recommendations for course formats, specialty-specific tracks, and pricing strategy for HSam Academy's medical education expansion.
